WHAT IS AQUACLEAN?

Aquaclean® Technology is a revolutionary fabric treatment that allows you to clean **stains using just water**. This provides you with simple fabric maintenance in the minimum amount of time.

Aquaclean helps to remove the majority of household stains (*wine, ink, sauce, fat, mud, chocolate, cream, etc.*) making life easier and giving you more time for the important things.

aqua clean[®]
EXTREME

Aquaclean Extreme fabrics have a structure designed to facilitate cleaning and prevent claws from digging in to the fabric*, plus they have a Safe Front treatment that prevents the proliferation of bacteria and mites.

**These fabrics are not indestructible, but they do help to prolong your sofa's lifespan.*

Health, Hygiene and Well-being

Bacteria and mites really do proliferate if you have pets at home.

But Safe Front is a fantastic ally against these organisms, which can cause allergies, especially in children and the elderly.

Longer Lasting

These collections have a physical barrier – a layer between the fabric loops and the top visible part of the fabric which prevents accidental snagging, not only caused by pets, but also by jeans rivets, zippers or rings.

Easy Maintenance

The surfaces of these collections are completely smooth, which facilitates the removal of pet hairs from the fabric.

RECOMMENDED FABRICS FOR LIVING WITH A PET

Aquaclean's recommended fabrics have a protective coating developed with our innovative technology that behaves like an elastic and flexible barrier. Preventing pets nails from reaching the core fabric and fraying the fibers.

Aquaclean fabrics collections recommended for homes with pets:

"There is no substitute for suitable pet training in the home. These fabrics cannot be guaranteed against possible destruction by your pet."

SAFE FRONT® TECHNOLOGY

This technology, also owned by **Aquaclean Group**, is intended to combat the presence of mites, mildew and bacteria in upholstery products, preventing the onset of allergies and other associated problems.

WHAT IS SAFE FRONT®?

SAFE FRONT® is a protection against mites, fungi and bacteria. It is a totally ecological and harmless method of eliminating the presence of mites, fungi and bacteria in fabric. This development incorporates a shield which, in natural way, prevents domestic dust mites from reproducing. These mites cause a large number of allergies. In addition, it also protects fabrics against fungi and bacteria, thus obtaining a totally hygienic upholstery material.

SAFE FRONT® is specially useful in homes with pets due to the proliferation of dust mites and bacteria in these animals. It is fulminant against the presence of these microorganisms.

OEKO-TEX® STANDARD 100 CERTIFICATE

100% Eco-friendly. This guarantee means that we have made these fabrics with total respect to the environment thanks to the application of new eco-friendly technologies.

FIRE RETARDANT TECHNOLOGY

Fire retardant pursuant to European Standards for buildings. Certified BS5852 (cigarettes and matches) Part 1 and 2 (UNE-EN-ISO 1021-1 & 2). To ensure the fabric does not react to a heat source.

AQUACLEAN CONTAINS NO PFCs

In the textile sector, PFCs are artificial substances that have been used due to their effectiveness against the repellency of water, oil and dirt in general.

The processes of production, cleaning and disposal at the end of its useful life, makes these compounds a threat to people, since this type of substances accumulate in living tissues becoming potentially carcinogenic.

The **European Commission**, in addition to the actions and campaigns that have been carried out since 2012 by Greenpeace, has led to an important increase in the number of products with **PFC-Free**.

Aquaclean has joined this initiative, as we think that it is our responsibility, facing the legacy that we will leave to future generations, to avoid this type of substances and look for other alternatives to more technological, more sustainable and more eco-friendly PFCs.

Being part of this for a years and seeing the importance of supporting these type of actions aimed at protecting our health and protecting the environment, **at Aquaclean we do not use PFC's** in the manufacture of our fabrics, adhering to the **PFC Free** philosophy, because together we can support green manufacturing through responsible consumption.

AQUACLEAN CONTRACT COLLECTIONS

Discover our **Aquaclean Contract Collections** offering a huge variety of colours, plain fabrics and prints, all with the Aquaclean Contract guarantee. Top quality fabrics resistant to continued daily use.
